Copy shortcode to render this widget anywhere on your website      Copy PHP version of shortcode to render this widget anywhere on your website

Save Changes

7. Click the **Save Changes** button to save this new widget.

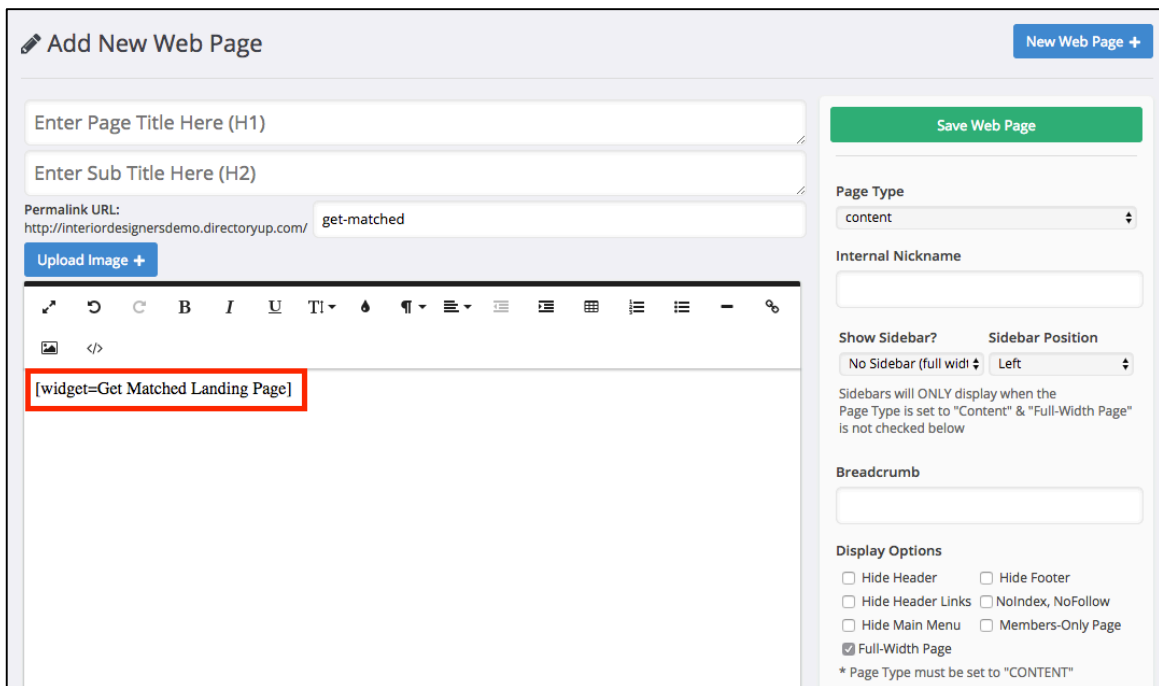

8. In your Brilliant Directories website's admin panel, navigate to **Content > Create Web Page**.

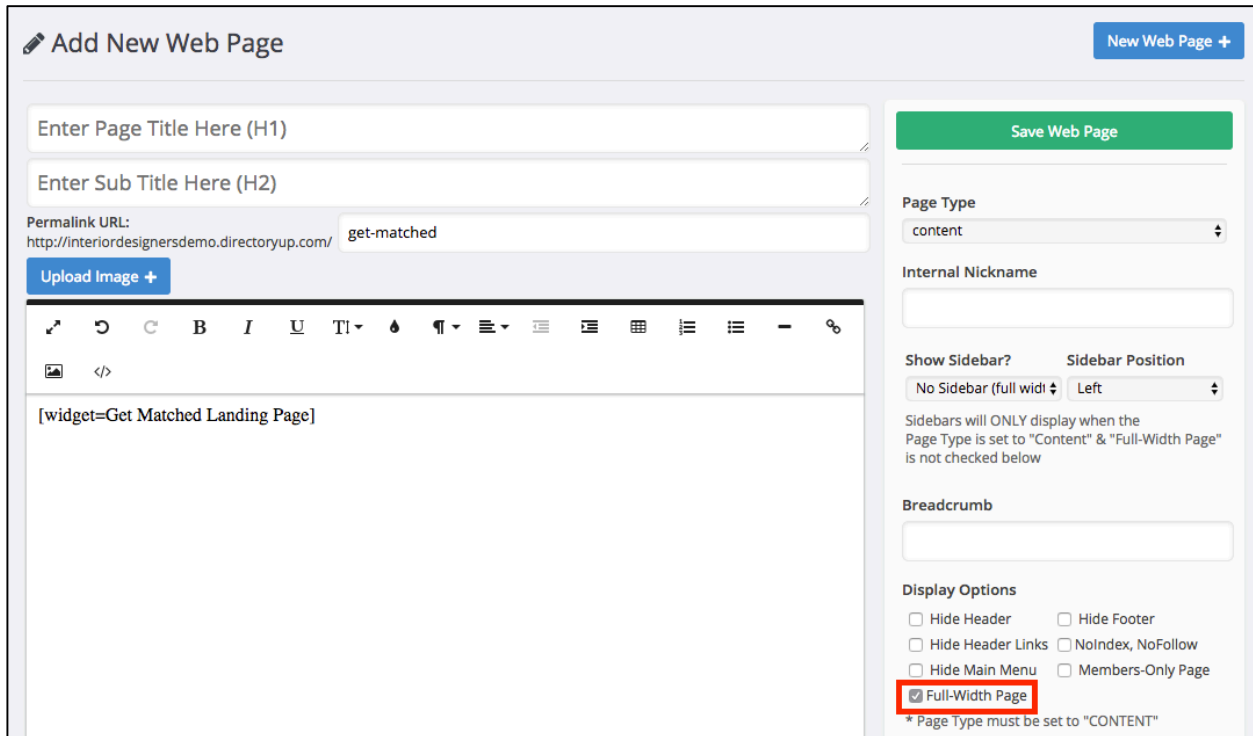

9. Assign a URL to this new web page, such as: get-matched

10. In the large content area, paste the widget's shortcode that you copied in Step 6.

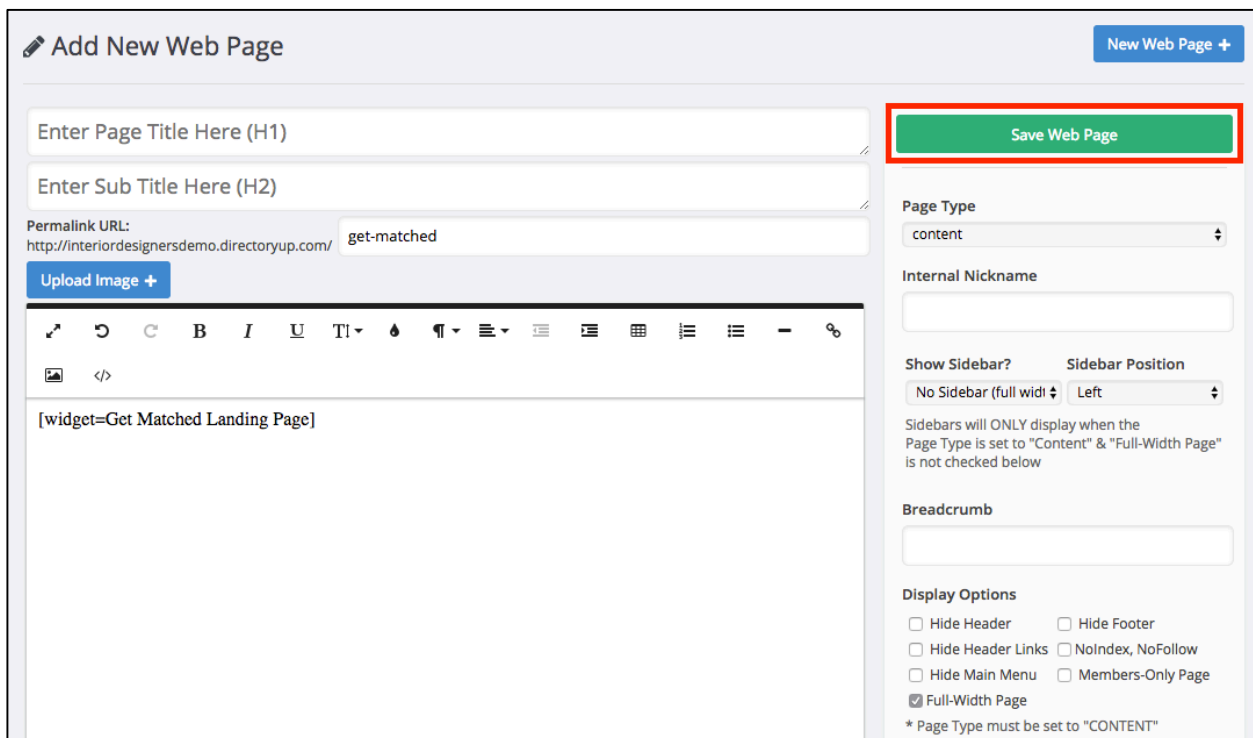

11. In the page's Display Options, check the box next to **Full-Width Page**.

The screenshot shows the 'Add New Web Page' interface. On the right-hand side, under the 'Display Options' section, the checkbox for 'Full-Width Page' is checked and highlighted with a red box. Other options include 'Hide Header', 'Hide Footer', 'Hide Header Links', 'NoIndex, NoFollow', and 'Hide Main Menu'. The 'Page Type' is set to 'content' and 'Show Sidebar?' is set to 'No Sidebar (full width)'. A note at the bottom states '\* Page Type must be set to "CONTENT"'. The main content area contains the widget code '[widget=Get Matched Landing Page]'.

12. Click the **Save Web Page** button to save the page and set it live on your website.

This screenshot is identical to the previous one, but the green 'Save Web Page' button at the top right of the settings panel is highlighted with a red box. The 'Full-Width Page' checkbox remains checked.

13. You can now add this page your website's main menu, link to it in your email newsletters, post the link to this page on your social media accounts, and more.
